Virus Transport and Preservation Medium (Classic)

Product Name	Virus Transport and Preservation Medium (Classic)
Catalogue Number	BSV-COV-003-25/ BSV-COV-003-100
Size	25 pcs / 100 pcs

Description:

Virus Transport and Preservation Medium

Product Details:

Features:

- Multiple antibiotics are used in the solution to prevent bacterial and fungal contamination.
- BSA was added as protein stabilizer, protect virus samples and improve separation rate.
- The thickening and leakage prevention design ensured the samples non leakage, in accordance with WHO regulations and biosafety regulations

Applications: Applicable for the collection and transportation of clinical flu, avian flu, HFMD, measles and other virus samples as well as mycoplasma, urea plasma, chlamydia and other samples.

Additional Information: Virus transport and preservation medium is red or colorless, transparent, non-precipitating liquid. If the properties change, such as yellow, it is prohibited to use.

Process

After collecting sample, short preserve at 2-8°C and long preserve at -80°C.
